

# Ansuz Mainz8 D3

## POWER DISTRIBUTION BLOCK

**T**he Ansuz Mainz8 power distributor is a high-quality and versatile product offering a range of audiophile benefits. With eight versions available from X 3 to D-TC Gold Signature, there is

an option for every budget and every system. The mid-to-upper tier Mainz8 D3 is designed to deliver clean AC power to components in a system, using innovative technologies such as analogue dither and Tesla coils to reduce noise. The cabinet is made of a natural-based composite, and features Darkz metal feet with titanium balls. The Mainz8 D3 is available with EU and US sockets. Although it can be used with cables from any brand, Ansuz offers a wide range of power cables and recommends using its A2 cables at the Mainz8 D3 level.

### Consistently impressive

We tested the Ansuz Mainz8 D3 with various components, and it consistently delivered impressive results, improving image depth, listener relaxation, dynamics, and timing. Systems were more open and natural, with quieter backgrounds and increased low-level detail. The Mainz8 D3 even enhanced the performance of analogue sources, such as phono stages and turntables, without compromising their timing. It universally reduced noise and revealed more musical detail.

The Mainz8 D3 power distributor is highly recommended for audiophiles seeking clean power delivery and improved sound quality. It offers exceptional performance, versatility, and compatibility with various components. Thanks to its innovative technologies and attention to noise-reducing detail, the Mainz8 D3 is a valuable addition to any high-end sound system.
